

# Massachusetts Juvenile Detention Alternatives Initiative Dashboard

## Statewide Overview: January–March 2018 Update

The Juvenile Detention Alternatives Initiative (JDAI) — a data-driven, public safety partnership between the courts, juvenile justice agencies, and community stakeholders — seeks to reduce unnecessary and harmful use of secure detention for low-risk juveniles, while ensuring that the **right** youth is in the **right** place for the **right** reasons. The JDAI Data Committee publishes this quarterly dashboard to help stakeholders track progress and identify areas needing reform. Follow the links below for more information.

## Statewide Overview: January–March 2018 Update

**Juvenile Court Surrender Notices, CY18 Q1**

When a youth violates probation conditions, the juvenile probation officer files a notice of surrender. This graph displays the percentages of such notices, grouped by types: non-delinquent (technical) violations, delinquent & non-delinquent violations, and new delinquent violations. Source: Office of the Commissioner of Probation (OCP)

**Types of Detention Used**

Youths held on bail until the next court appearance are placed within the DYS detention continuum — hardware secure, shelter care, or community-based options (supported foster care) — depending on the Detention Placement Instrument (DPI) score, professional screening, geography, and availability. Source: DYS

**Detention Admissions of DCF-Involved Youth**

This graphic shows a time series of the statewide percentage of youth admitted to detention with open Department of Children & Families (DCF) cases, a figure which has hovered at around 40% of all detention admissions. Source: DYS

**Detention Admissions of DCF-Involved Youth, CY18 Q1**

DYS ascertains whether each youth admitted to detention is “DCF Involved” — that is, has a currently open Care and Protection, Children Requiring Assistance, or Voluntary Services case with the Department of Children and Families (DCF). Source: DYS

**Risk Scores of Detained Youth by Court, CY18 Q1**

**Detention Admissions by Gender**

The number of youth held on bail trended downward from 2010 until 2013, when Juvenile Court jurisdiction was expanded to include 17-year-olds. Females constitute 21.5% of all admissions from 2010 through Q1 of 2018. Source: DYS

DYS determines placement type and security level for detained youth in part with the Detention Placement Instrument (DPI), an objective screening tool that uses delinquency history and present court involvement to score risk as Low, Medium, or High. Here, detention admissions for Courts that held more than 5 youth on bail during the quarter are grouped by DPI score, and each court's totals are represented as percentages. In 2018 Q1, 11 detention admissions statewide had incomplete DPI assessments. Source: DYS
